

MARLY SKIN®

The Original

Skin protection involving easy and pleasant application

MARLY SKIN® is applied to the skin area in need of protection which should be dry and free of grease.

Figure 1:
• Clean the skin with soap and water and dry thoroughly.

Figure 2:
• Before using MARLY SKIN®, shake the can vigorously, hold the can upside down and spray a walnut-sized amount of foam (standard application).

Figure 3:
• Apply a thin layer of MARLY SKIN® to the skin surface in need of protection and rub in well. Depending on the size of the application area, repeat as necessary.
• Let dry for three minutes after applying. The skin is now protected for four to six hours even if the skin is washed with soap and water or disinfected several times throughout. All natural functions such as perspiration, respiration, and sense of touch are unaffected during this time.

MARLY SKIN® is neither visible nor otherwise noticeable. It is perfectly harmless when it comes in contact with the eyes, mouth or food and leaves no marks behind.

Ingredients:
AQUA, BUTANE, STEARIC ACID, PROPANE, SORBITOL, TRIETHANOLAMINE, PROPYLENE GLYCOL, GLYCERIN, DIMETHICONOL, TOCOPHERYL ACETATE, METHYLPARABEN, PROPYLPARABEN, BISABOLOL

MARLY SKIN®

The Original

Reliable skin protection

MARLY SKIN® meets the requirements for effective and long-term skin protection while maintaining ideal physiological conditions.

- absorbs immediately, is not visible or noticeable on the skin
- suitable for use on the whole body (including the face)
- easy and clean to handle
- no material abrasion, no occlusion
- non-greasy and does not smear
- no impairment to sense of touch
- economical to use
- natural skin functions such as breathing and perspiring are unaffected
- 4 - 6 hours of skin protection, even if hands are washed and disinfected multiple times throughout
- no removal necessary, resolves itself without any residue
- completely harmless if in contact with the eyes, mouth or food and leaves no marks behind

Ideal skin protection

Healthy skin is the primary organ in the human body that protects us from our surroundings and has physiological defense mechanisms against a variety of noxious substances.

Several factors may interfere with its important protective function. The most important are:

- immobility
- incontinence
- exposure to substances which are aggressive to the skin

The revolutionary skin protection principle

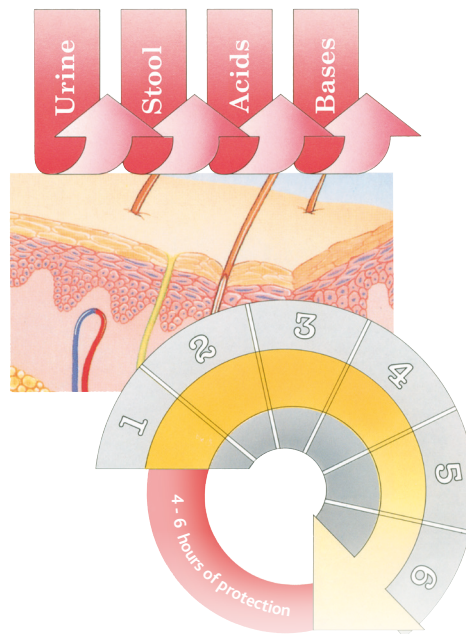

For more than 20 years, millions of applications around the world have confirmed extensive dermatological and clinical evidence of efficacy.

MARLY SKIN® implements a unique skin protection principle which is formed after applying a protective film that *penetrates the skin* instead of covering it, thereby preventing it from being subject to abrasion (such as with creams and ointments). The result is highly effective protection against contaminants and irritants –

like a second skin!

MARLY SKIN®

The Original

MARLY SKIN® has become a skin barrier standard of doctors and nurses around the world. *Clinically tested – tried in practice!*

MARLY SKIN® especially protects heavily stressed, sensitive skin through its clinically tested skin compatibility.

MARLY SKIN® eases the nursing of incontinent and immobile patients and is an effective and preventative solution for patients at risk of bedsores.

MARLY SKIN® supporters:

"MARLY SKIN® is recommended for the prevention and care of decubitus ulcers in treating bedridden and care-dependent patients..." (Professor Dr. Baumann, Vienna)

"To encourage epithelialisation, we use MARLY SKIN® near the edges of the wound with great success..." (nurse Doris M., Red Cross Hospital, Bremen)

"I am now 94 years old and for years, I've been treated exclusively with MARLY SKIN® around sores to avoid skin irritation. My skin continues to be in great condition..." (Ursula B., Freiburg)
