

MARLY SKIN®

The original

DO NOT FORGET:

The ideal skin protection foam

Twice a day MARLY SKIN® – always before you start work!

The skin needs to be dry + clean!

Shake the can well to create the foam, hold the can upside down and dispense a walnut size dollop of foam.

Rub the foam into the area of skin that needs protection, anywhere on the body.

- ✓ Let it take effect for 3 minutes, then the skin has a highly active protection for 4 hours, also in the event of contact with water, soap, disinfection agents, etc.!

The MARLY SKIN® effect principle:
Protection *in* the skin and not only on the skin!

- ▶ The skin can breathe + sweat,
- ▶ the tactile sense is not affected,
- ▶ does not grease and lubricate,
- ▶ neither visible nor sensible, completely harmless, e.g. for eyes, mouth or food,
- ▶ does not need to be removed!

Clinically tested
and confirmed
